- (i) Carrying out the Hydrographic / Bathymetry Survey of the Thenpennaiyar and Sankaraparani Rivers in Puducherry rivers in the U/s & D/s of the barrage axis

(About 20 line km).

(ii) **Bathymetric survey shall be carried out as follows:**

Cross sections are to be undertaken at suitable interval within the stretch of river development in municipal area. The cross section of river shall be undertaken at the point of intersection of polluted drains and river as decided by team leader/Engineer in charge. Width of the river may vary from 100 m to 3000 m depending on the topography.

- (iii) To establish 1 Nos. of TBM's showing X, Y & Z co-ordinates in longitude, latitude and with (X, Y) co-ordinate with reference to local co-ordinates and RL.
- (iv) Establishing vertical control (accuracy +0.1m) and establishing benchmark (accuracy + 5 millimeters) at suitable interval. Transfer of Benchmark/datum w.r.t. MSL.
- (v) Establishing horizontal control and marking selected points on the shore at suitable intervals. (accuracy +1m).

Sl. No.	Item	Total length of Cross sections
1	Carrying out the Hydrographic / Bathymetry Survey of the Thenpennaiyar and Sankaraparani Rivers in Puducherry Region in the U/s & D/s of the barrage axis (About 20 line km).	20 km

As stated earlier, the total combined length of cross-sections upstream and down stream of proposed barrages will be about 20 km, however, it may decrease or increase during the course study and the same will be informed to the successful bidder and the bidder will not have any claim for the revision of rate especially in the case of decrease in area to be surveyed, however, in case of substantial increase (i.e. more than 25%) in area to be surveyed the bidder may have to decrease the rate based on mutually negotiated rate.

**(b) Technical Specifications**

**Establishment of Bench Mark**

The levels shall be on the basis of GTS bench marks in the vicinity. The contractor shall transfer the benchmark to the site. All levels shall be related to IMSL. New Bench mark shall be established either on existing abutments, Dam site or other monoliths which shall meet the stability requirement for bench marks specified by Survey of India. Alternatively, new bench mark of suitable type shall be built to survey of India standards. Value of bench marks shall be established to accuracy better than +/-5 millimeters.

**(c) Establishment of Horizontal control and marking the selected points onshore**

Horizontal control established shall be properly connected to nearby G.T.S. or other points approved by Engineer-in-Charge.

**(d) Establishment of Vertical Control**

The vertical control shall be established with suitable water level gauges and/or GTS Bench Marks within or near the survey area and simultaneous tidal observations shall be taken to reduce the soundings to a recoverable or approved MSL. Sites of water level gauges should be carefully selected to ensure the freeflow of water levels to and from the gauge locations. Approval of the site engineer should be obtained for the location(s) of the water level gauge(s). For vertical control and determination of MSL, levelling between bench marks and to determine water level gauge zero etc. The levelling accuracy shall be + 0.10 m. For recording of water levels, water level gauges shall be erected at approved locations. The water levels shall be recorded at interval not more than 15 minutes. However, time and height of low water shall be accurately determined.

**(e) Carrying out Soundings**

The sounding data shall be recorded and reported at an interval of 10m interval in deep channel portion and 5 m interval over spill reach/shoals/large islands. Soundings shall be carried out using suitable equipment which yield accuracy of  $\pm 0.10$  m or better. **Continuous recording type of eco sounder shall be used for this survey.** Relevant environmental parameters which effect accuracy of echo-sounding shall be measured regularly and appropriate correction shall be applied. 'Bar Checks' shall be carried out daily before commencement and after completion of days work. Bar Check equipment/tackle and its calibration shall be got approved from Engineer-in-Charge. ECO Rolls shall be got countersigned by WAPCOS officials and shall be submitted to WAPCOS along with the Survey Reports.

**(f) Position Fixing**

For position fixing the contractor shall use a suitable position fixing equipment with horizontal positional accuracy of  $\pm 1$ m. The contractor may however propose alternative position fixing system that meets above mentioned positional accuracy, provided at least 3 lines of position can be used to determine position. The position fixing system shall be calibrated against a most accurate system or a fixed base line before deployment to the satisfaction of Engineer-in-Charge. While taking soundings vessel shall be moved at a slow speed (not greater than 3 knots).

**(g) Reporting Pattern**

- (i) A survey report in triplicate describing the conduct of the survey along with a soft copy and all observed data, along with original records viz. calculations field books, measurement books, Eco-rolls etc. shall be submitted to WAPCOS Ltd. The data furnished shall be adequate to re-plot the survey chart independently on the basis of these documents.
- (ii) The charts shall be plotted at 1:1000 scale or any other scale as directed by Engineer-in-Charge. U.T.M. grid and geographical grid shall be marked on the chart as per normal cartographic practice. Soundings shall be shown in meter and decimeters and shall be reduced to Chart Datum. **Contours shall be marked at 0.5 m interval.** On the chart the soundings shall be marked duly showing high water and low water lines, delineation of shoals, symbols and legends, Northline etc. As the area covered shall be in more than one chart, the contractor shall provide a single chart (Index Map) in triplicate. All charts/maps should display reference to the ground station and datum based on which the controls are fixed and shall indicate date/time of surveys and name of person in-charge carrying out the surveys.
- (iii) Master copy of each charts, map shall be provided on stable film (RTM) along three hard copies and one soft copy on Compact Disc in a format compatible with AUTOCAD.
- (iv) The contractor shall also integrate the topographic survey map with hydrographic survey. The topographic survey map will be provided by us.
- (v) The contractor shall submit survey reports as per specification laid down. However, the contour shall be marked at an interval 0.5 m on the survey charts.
- (vi) Survey maps shall be plotted at 1:1000 scale. An Index Map (Single Chart) showing entire area of survey and the physical features mentioned above shall also be prepared and submitted in triplicate along with soft copy as specified.
- (vii) In addition to the above a longitudinal section of the deepest channel in the sea for establishing the sea bed profile shall be provided. The scale of the L- section shall be decided by Engineer-in-charge.

### **3.0 MOBILIZATION AND DEMOBILIZATION OF EQUIPMENT & PERSONNEL**

Mobilization of equipment/tools & tackles and personnel at all survey locations including demobilization after completion of all types of field tests as per specifications, drawings and direction of Engineer-in-Charge. No separate payment shall be paid for mobilization & demobilization. Cost for this activity shall be built in quoted rates of different items.
